

On-Line Child Sexual Assault Prevention & Awareness Training

Approximately 60 Minutes

Anyone working in a Maine school is required by law to attend child sexual assault prevention & awareness training within six months of their initial hire, and renew their certification every four years (LD 1180, February 2015). The preferred and best way to receive child sexual assault prevention & awareness training is in a live facilitated awareness session, but sometimes this option is not realistic so an on-line session has been developed.

Before you begin, obtain the [MSAD 75 Child Sexual Assault Prevention Training, Employee Verification Form](#) from Human Resources.

When ready:

1. Access and view the on-line child sexual assault prevention & awareness video at:
http://link75.org/district/departments/human_resources

2. When you have completed viewing the video:
 - Complete the [MSAD 75 Child Sexual Assault Prevention Training, Employee Verification Form](#).
 - Set-up a meeting with a school employee who is a Certified Trainer. MSAD 75 Certified Trainers include all school counselors and social workers, and Mary Booth at the District Office.
 - Bring your completed Verification Form to your meeting and be prepared to review your answers. Once the trainer has approved you for certification, they will sign your form.
 - Send your signed Verification Form the Human Resources Department.

3. If you have any questions, please contact Mary Booth, District Health Coordinator, at 729-9961 x254.
